## Availability

The published papers may be viewed in the library of Haslemere Educational Museum. They are all out-of-print, except that printed copies of Ponsonby (1978) may be available on request to Andy Swan (free of charge). Struthers (2020) and, it is anticipated, papers published subsequently, will be available as digital copies from this web site. The Society is also considering making available scanned copies of selected old papers.

## Further Contributions

Please contact one of the Society's committee members if you may be interested in writing a paper for publication. Such papers could, as has been customary, address a major group of organisms in our area, but more specific subject matter (such as the paper on adders) or perhaps a geographically-themed paper (e.g. on wildlife of a specific wood, common or heath) could be considered.
