

HASLEMERE NATURAL HISTORY SOCIETY

Our area was originally defined as a six mile circle, centred on Haslemere Town Hall, this being considered a reasonable distance for Victorian ladies to cycle!

In 2014, the boundary was extended to ten miles, and it is this which is shown on the above map.

Records are maintained of sightings within this area, but we're also very interested to hear of anything particularly unusual just outside our boundaries. So do, please, e-mail us with details if you see something interesting whether it's animal, vegetable or fungus.
